Objective

Motivated and detail-oriented student passionate about building a career in the IT sector. Dedicated to learning and applying cutting-edge technologies to develop impactful software solutions. Proactive and eager to contribute to innovative projects while continuously improving skills

Skills

- Programming Languages: Python, Java Basics
- Web Technologies: HTML, CSS, JAVASCRIPT BASICS
- Database Systems: SQL
- Software Application: MS Office
- Tools: VS Code, Cadence Virtuoso
- AI Tools: GPT, GROK, Cursor, Copiolet
- Platforms: LeetCode, HackerRank
- Soft Skills: Agile mindset, problem-solving, teamwork, adaptability, communication

Education

B TECH in Electronics And Communication 2021 – 2025

- Raghu Engineering College
- GPA: 9.0

Intermediate MPC 2019 – 2021

- Sri Chaitanya Junior College
- Percentage: 87

Secondary Education 2018 – 2019

- Gayatri School
- GPA: 9.5

Projects

A HIGH SPEED 32-BIT DECIMAL AND XS-3 ADDERS WITH NOVEL CARRY LOOK-AHEAD ADDER

- Tools: Cadence Virtuoso
- Developed a high-performance 32-bit decimal and XS-3 adder using a novel carry look-ahead adder (CLA) architecture to minimize delay and power consumption.
- Implemented advanced carry prediction and optimized carry propagation logic to enhance computational efficiency and scalability for larger digital systems.
- Created a VLSI architecture and simulated it in Cadence Virtuoso (45nm CMOS), achieving speed improvement and energy efficiency gain over conventional designs.
- Applied in-depth analysis of 60+ technical publications to synthesize key insights, leading to a design now referenced in ongoing projects by 10 engineers.

LOGIN PAGE

- Programming Language: HTML AND CSS
- Developed an improved sign-in system to enhance user experience and reduce first-time visitor errors.
- Implemented JavaScript validation strategies to streamline input handling, achieving to reduce in user error reports.
- Created a modern, user-friendly login portal with optimized input fields, ensuring better usability and

engagement.

- Applied usability testing and design reviews to identify and resolve three major pain points, improving the overall sign-in process.

TIC TAK TOE

- Programming Language: PYTHON
- Developed a Python-based Tic Tac Toe game to enhance single-player engagement with an AI opponent.
- Implemented the minimal algorithm for optimal AI decision making, achieving strategic game play experiences for 200+ users during testing.
- Created a robust game logic system with win, draw and invalid move detection, ensuring accurate and seamless game play.
- Applied error-handling mechanisms and debugging techniques to validate user inputs, identifying and resolving five critical bugs for improved reliability.

Certifications

- Java Programming – Coursera
- Python – Cisco Essentials
- Git & GitHub – Udemy
- SQL - Hacker Rank

Internship

- Software Developer Intern – CodeCrafters Technologies
- Python Developer Intern – TCS iON
- Java Programming Intern – TechBloom India

Achievements

- Participated in Badminton tournaments.
- Awarded as Best NSS Volunteer.
- Achieved 2nd place in Tech Game.
- Recognized for “Best Project Demo” at college tech fest (2024)
