PROFESSIONAL SUMMARY

Software Developer with 1.5 years of combined experience across frontend and backend development, including 1 year at Koundinya Satech and 6 months of backend development experience at Infosys. Experience with React.js, JavaScript, TypeScript, Node.js, REST API integration, reusable UI components, debugging, and modular application development. Seeking a frontend-focused Software Development Engineer role.

TECHNICAL SKILLS

Frontend Development: React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, responsive design, reusable components

Backend Development: Node.js, REST APIs, JSON, API integration

Development Tools: Git, GitHub, Visual Studio Code

Development Practices: Debugging, modular code, form validation, API error handling, collaboration

PROFESSIONAL EXPERIENCE

Frontend Developer | Koundinya Satech | July 1, 2025 – July 2026

- Develop and maintain React-based interfaces for business application modules using reusable components and modular code.
- Implement UI interactions, form behavior, validation, conditional rendering, and data presentation using JavaScript and TypeScript.
- Integrate frontend screens with REST APIs and process response data for application workflows.
- Troubleshoot UI defects, refine layout consistency and responsiveness, and test changes against project requirements.
- Collaborate with team members using Git-based workflows to maintain and update application code.

Backend Developer | Infosys | February 2025 – July 2025

- Contributed to backend development tasks using [insert the actual language and framework used].
- Worked with API request and response flows, data validation, debugging, and defect resolution within assigned tasks.
- Collaborated with team members to test changes and investigate application issues.
- Supported code maintenance and development documentation as required by the project.

PROJECTS

Enterprise HR / People Management Application | Koundinya Satech

- Contributed to React and TypeScript interfaces for enterprise workflows using reusable components and consistent layouts.
- Integrated UI screens with backend APIs for forms, tables, and operational data where applicable.
- Specific modules and individual contributions: [add only the modules you personally worked on].

Login Page | Academic Project

- Built a login interface using HTML and CSS with JavaScript input validation.
- Refined form interactions and layout to support a clear user experience.

Tic-Tac-Toe Game | Academic Project

- Developed a Python-based Tic-Tac-Toe game with win, draw, and invalid-move detection.
- Implemented input handling and basic error checking.

High-Speed 32-Bit Decimal and XS-3 Adders | Academic Project

- Designed and simulated a carry look-ahead adder architecture using Cadence Virtuoso.
- Evaluated the design in a 45 nm CMOS environment with focus on delay and power consumption.

EDUCATION

B.Tech, Electronics and Communication Engineering | Raghu Engineering College | 2021–2025 | GPA: 9.0

Intermediate, MPC | Sri Chaitanya Junior College | 2019–2021 | 87%

Secondary Education | Gayatri School | 2018–2019 | GPA: 9.5

INTERNSHIPS

- Software Developer Intern, CodeCrafters Technologies
- Python Developer Intern, TCS iON
- Java Programming Intern, TechBloom India

CERTIFICATIONS

- Java Programming, Coursera
- Python, Cisco Essentials
- Git and GitHub, Udemy
- SQL, HackerRank

ACHIEVEMENTS

- Best NSS Volunteer
- Second place in Tech Game
- Best Project Demo at college tech fest (2024)
